

North Sea Conference 2015

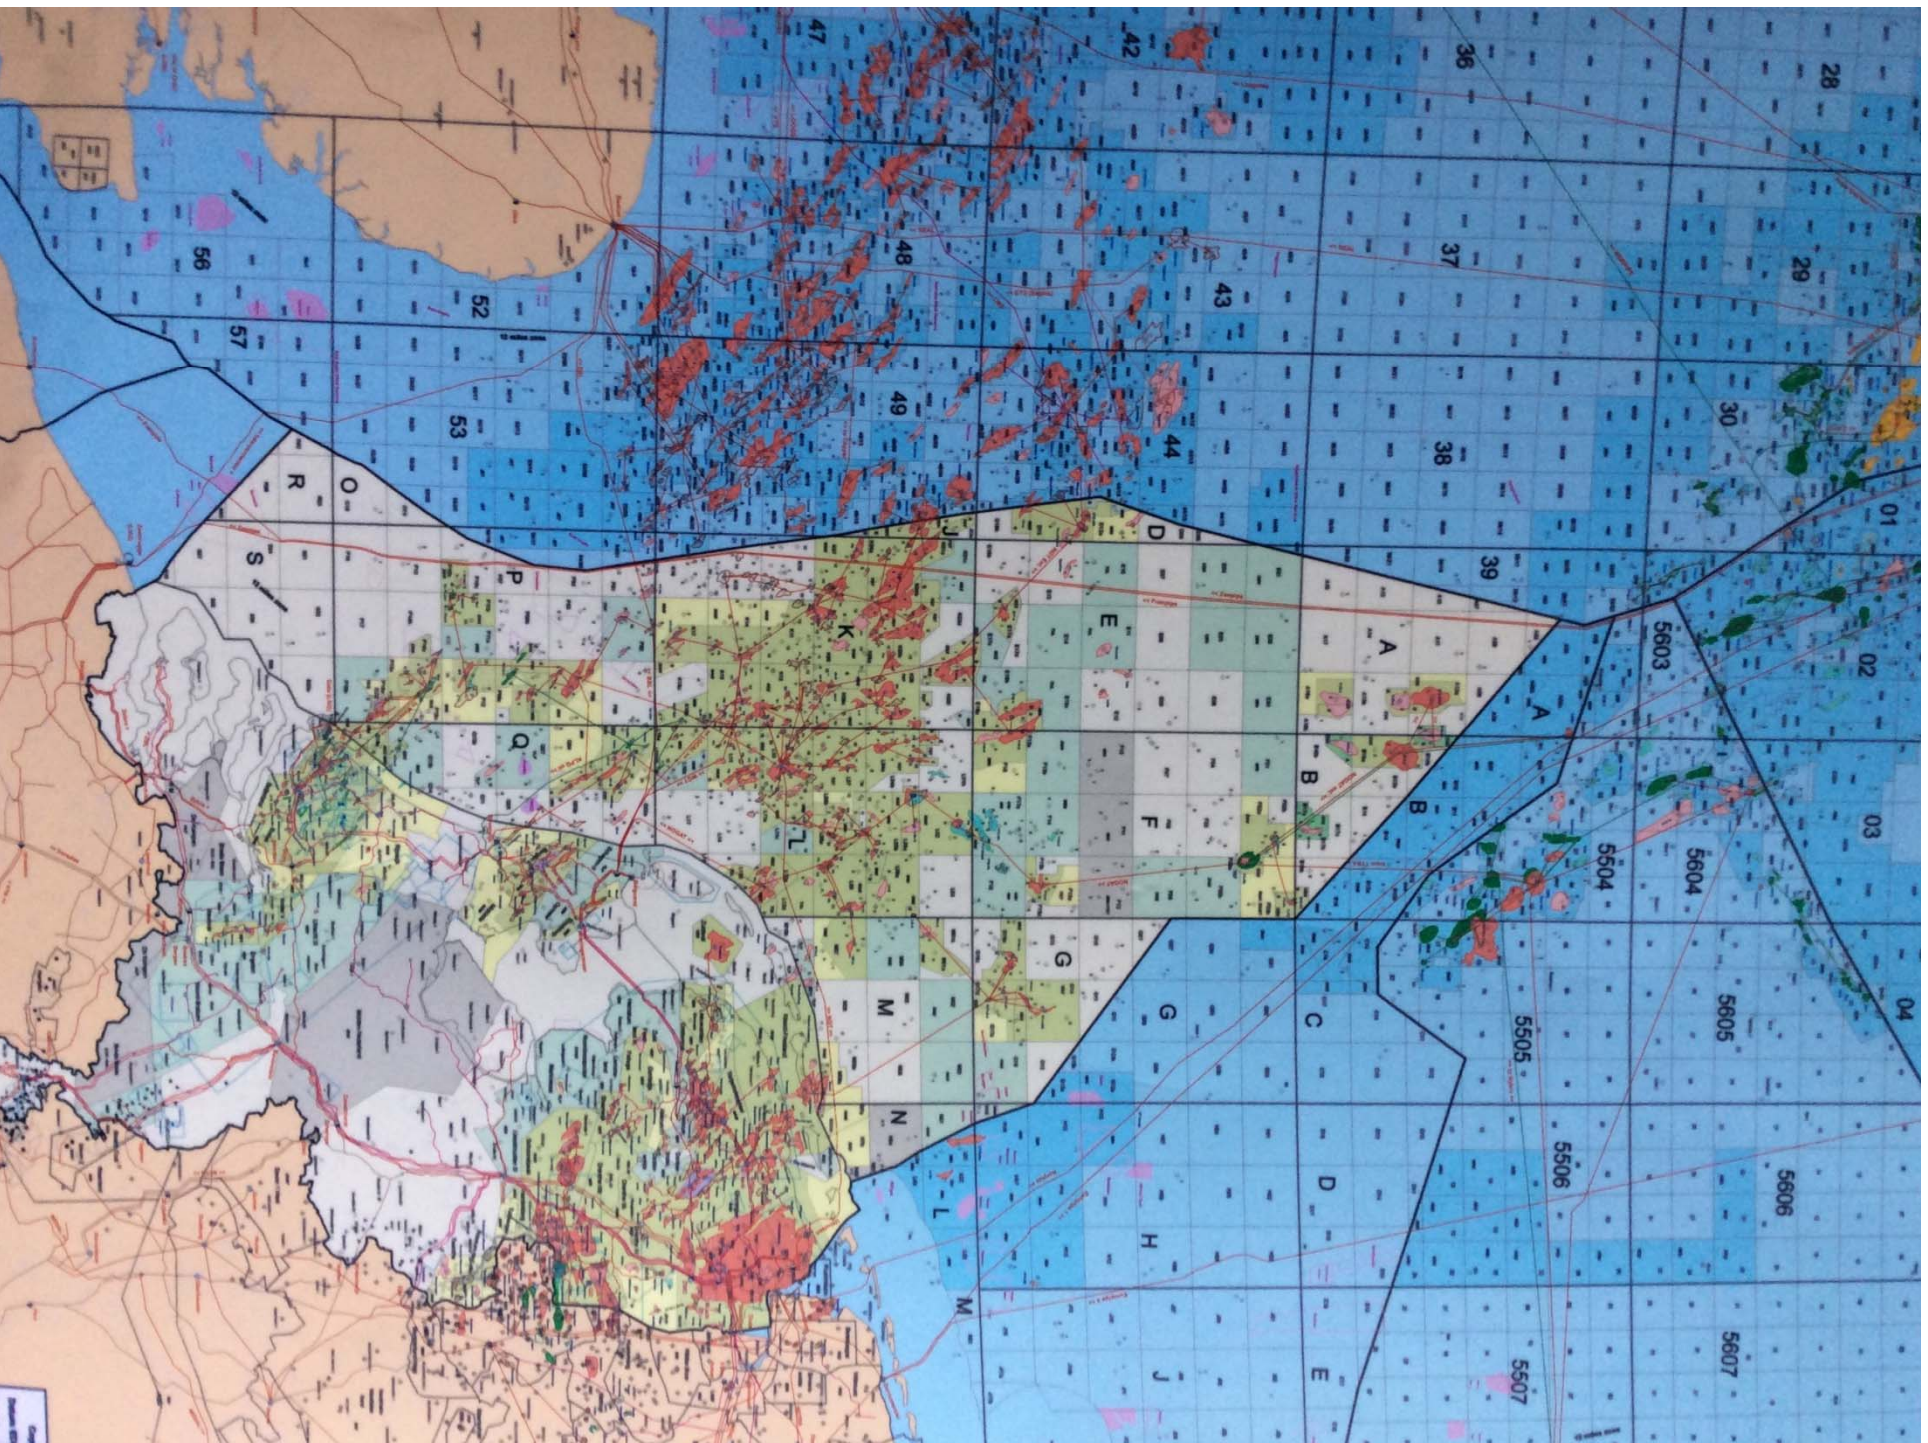

Match making: cooperation and innovation

Conoship Guus van der Bles

Bargemaster Martijn Koppert

NAM Haije Stigter

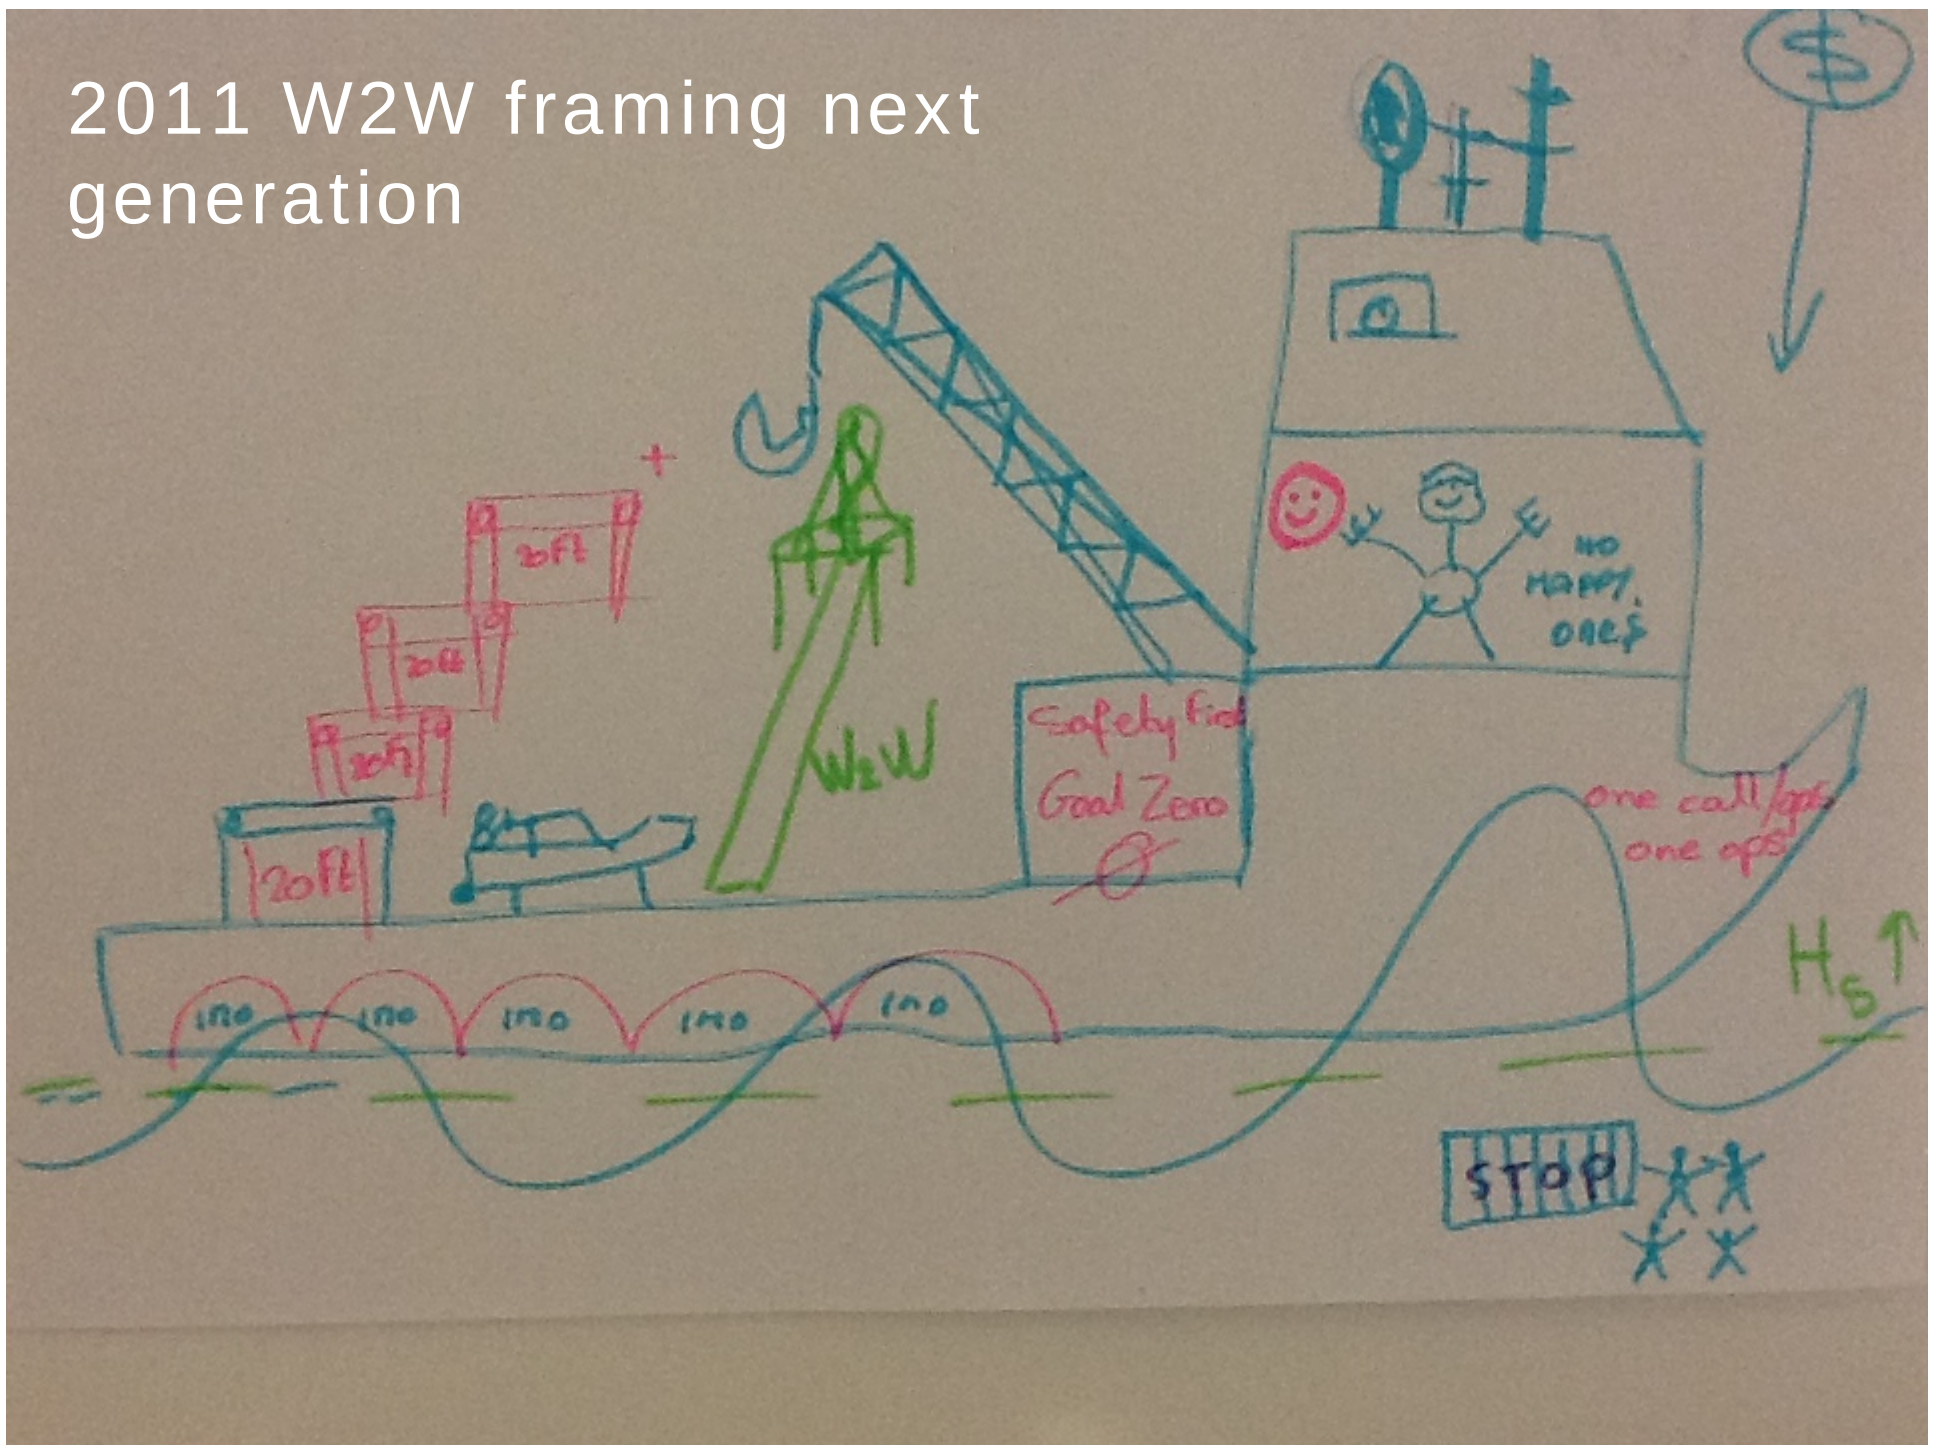

2000 Marine Access introduced

2011 W2W framing next generation

Setting the Scene

■ The operational landscape is changing:

- Production dependency from unmanned facilities (75 – 85%)
- Wet gas conversion locations will require bunkering of KHI and CI
- Increase Marine Access facilities L13H will be a new benchmark
- New wells require “Cold Well Start-up” (CWS) after 2-3 trip SD period
- Foam injection will require bulk foam supply / bunkering

■ Work execution methods are changing

- Marine Access facilities are designed to be visited bi-yearly by a Jack-up
- The Horn Star provided proof of a Walk to Work (W2W) concept is effective on Mini's

■ Business Case

- Maintenance Support Vessel
- Chemical bunkering and Cold Start Up integrated
- FTE neutral (onshore and offshore)
- UK ~ NL integration & harmonization
- Multiple location manning single day
